EDUCATION

B.Tech Computer Science and Engineering	2021–2025
J.C. Bose University of Science and Technology, YMCA Faridabad	8.6 CGPA
Coursework: Data Structures, Algorithms, OOPs, Operating Systems, DBMS, Computer Networks, Distributed Systems	
XII	2021
Springfields Public School	96.4%

SKILLS

Programming Languages	Java, C, C++, Python
Backend & APIs	REST API, Microservices, Spring Boot, Spring Security, JWT, Multithreading, Hibernate/JPA
AI / ML	Spring AI, OpenAI API, LangChain4J, RAG, Prompt Engineering
Database Management	SQL, MySQL, PostgreSQL, MongoDB, Redis, PGVector, AstraDB, Flyway
Cloud / DevOps	AWS, Azure, Docker, Kubernetes, CI/CD, Maven
Tools	Git, GitHub, Postman, Swagger, Kafka, SonarQube, JUnit
Other Skills	System Design, Design Principles, Agile, SDLC

WORK EXPERIENCE

Software Engineer — Veersa Technologies	July 2025 – Present
- Built scalable backend services for Healthcare, FinTech, and Cyber Fraud products using Java, Spring Boot, PostgreSQL, and AWS. - Designed a multi-tenant architecture with Flyway schema isolation, enabling secure enterprise client onboarding with zero-downtime migrations. - Architected the Billing Service, automating invoice generation for 10+ clients on AWS ECS using ShedLock for distributed scheduling. - Developed an Agentic AI chatbot for Drools Policy Optimisation, enabling natural-language analysis and optimization of fraud detection rules. - Optimized SQL/JPA queries and integrated Redis caching, improving API response times by up to 58%. - Enhanced the OCR pipeline (+30% accuracy), secured APIs with Spring Security + AWS Cognito, and maintained 80%+ JUnit test coverage.	
Software Engineer Intern — Veersa Technologies	Jan 2025 – July 2025
- Developed 20+ RESTful APIs for a CRM platform, reducing average latency by 25%, improving backend scalability. - Redesigned database schemas and optimized SQL queries, cutting data retrieval time by 20% for critical modules.	

PROJECTS

PR Sense: Agentic AI Code Review Platform	(Code)
- Built an AI-powered PR review system using Java, Spring Boot, Spring AI, OpenAI API, and Azure DevOps, cutting manual code review time by 60%. - Leveraged PostgreSQL and PGVector for repository-aware semantic code retrieval, enabling contextual and diff-aware automated reviews via vector embeddings. - Designed a custom MCP Server with an agentic RAG workflow for tool-driven code search and review generation.	
AI-Powered AskMe PDF	(Code / Video)
- Developed a Retrieval-Augmented Generation (RAG) pipeline enabling conversational querying of PDF documents with sub-2s average response latency. - Integrated OpenAI API, LangChain4J, and AstraDB with vector embeddings for intelligent semantic retrieval, achieving 90%+ query relevance accuracy.	

ACHIEVEMENTS

- Awarded **Achiever of the Month & Certificate of Appreciation** at Veersa Technologies for outstanding backend contributions and consistent high-impact delivery.
- Top 5 / 100+ teams** at the **Fork-It Hackathon** (IIT-Delhi), building a real-time collaborative tool in under 24 hours.
- Secured **98.9 percentile (Top 1.1% nationally)** in **JEE Mains 2021**.
- Solved **700+ problems** on LeetCode and GeeksforGeeks.
- Global Rank 596** in **GFG Weekly Contest 180**.
